## **Helpful Research Points**

While the specific information gathered will vary from street to street and be based on your communities' particular challenges and needs, the table below offers some potential data points and sources that could help you get to know your street. These data points are often publicly available within municipal, county, and state agencies.

### EQUITY

### **RESEARCH POINTS**

Population characteristics

Population trends

Housing types

Accessibility conditions

Costs of living

Other impact areas segmented by population characteristics (e.g. trafficrelated deaths by age)
